

Dedicated Servers

DDoS Protected High Performance Dedicated Servers

BLOCKDOS
Your Business, Our Protection

Dedicated Servers are way more flexible than other hosting options giving your organization full control over the security settings, choice of operating system, hardware configuration, and what applications you want to run on the server. We offer a wide range of brand new dedicated servers - high performance and top of the line branded hardware. We have presence in DCs all over the globe so we can offer you servers from US, Canada, Europe, Asia and even Australia. Most importantly, our long-standing relationship and partnership deals with the Datacenters allow us to offer you the best deals in the market! You can subscribe to our easy manage addon for full server management & advanced ddos protection addon for round-the-clock anti-ddos security.

Global Infrastructure

We have presence in Datacenters over 5 continents which allows us to provide secure, high performance dedicated servers and wide choice of locations for you. This enables you to pick up the best server location for your audience and even setup multi-location servers with our bundle server deals. With our global network capacity of over 15 Tbps, we can offer you very high bandwidth - 10TB or more & in some locations, unmetered bandwidth! You never have to worry about your hosting running out of bandwidth again just because you have high traffic or streaming on your server.

DDoS Protection

The best part about our global network is that we have Anti-DDoS capabilities thanks to our enterprise-grade hardware firewalls and clean pipe network. We offer free lite DDoS protection with all our dedicated servers worth \$500. If your websites come under massive attack, we will always have your back. Our advanced DDoS protection addon got you covered from all kinds of malicious DDoS attacks - be it Syn Flood, Application Layer 7 Attack or HTTP attack. For sensitive websites prone to frequent attacks, we can setup monitoring to pro-actively take preemptive actions whenever your service comes under attack.

Technical & Business Benefits

- **Save money** by getting the best deals in the industry
- **Peace of mind** with easy manage server addon
- **Flat pricing**, no bandwidth overage charges
- **Get protection** with our free lite DDoS security
- **Get redundancy** through our managed backup addon
- **Tier IV datacenter** server provisioning on request

Dedicated Servers

Monitoring & Easy Manage Addon

We pride ourselves in possessing one of the best support teams in the industry. So trust us when we say that with Easy Manage we will give you Hardware Support, Network Support, Firewall Configuration, OS Reloads, Server Hardening, Uptime Monitoring, Managed Backups and periodic Maintenance Tasks. This allows you to keep your eye on the prize - growing your business and leaving the rest to us. We maintain, optimize and secure your infrastructure alongside giving you a cost-efficient solution.

Transparent Pricing Model

We believe in fair business dealings and transparency in the entire array of our business operations. We disclose everything before you get in the contract with us - no hidden charges whatsoever. We deliver on whatever we promise and hold-on to that till the end of the contract. This allows you to plan your financial resources adequately without having to worry about a surprise credit card charge waiting for you!

BLOCKDOS Your Business, Our Protection

BlockDoS is a leading Canadian organization, established in 2005 as the most Secured Dedicated Hosting and Distributed Denial of Service (DDoS) Mitigation Service provider. We guarantee 99.9% uptime SLA on Enterprise Protection solution. Once your website is secured by BlockDoS, all the traffic will be routed through our global network of high-powered servers that inspect all incoming traffic, keeping hackers out while accelerating your traffic. BlockDoS delivers state of the art IT security solutions and excellence in business performance by ensuring a high level of security of the IT services; delivering a cost effective and sustained level of security that is aligned with needs of our clients; and developing and maintaining high levels of confidentiality, integrity and availability.
